GLOBAL MEDICAL SOLUTIONS

Starting as a supplier for hook and loop components alone, in the last decades the Velcro companies have also manufactured unique products for the medical market ranging from

- Disposable, single-use devices (like patient gowns, tracheostomy straps)
- High-end durable devices intended for long term re-use (like headgears, braces)

In collaboration with global leading medical companies, we create innovative healthcare solutions and supply our customers with our tapes, customised converting services as well as sub-assembly and OEM manufacture of finished goods through a worldwide network of production and distribution centers.

Through initial brainstorming of ideas, prototyping, worldwide manufacturing and logistics we, and thus our customers, keep up-to-date with regulatory requirements and introduce innovation in the medical market on an ongoing base, to create best-in-class products which enhance the quality of life for patients.
